National Strategy for Inner Areas

STRATEGIA NAZIONALE DELLE AREE INTERNE
AREE SELEZIONATE

Pilot Areas in Abruzzo (2014-2020)

Area 1: BASSO SANGRO TRIGNO

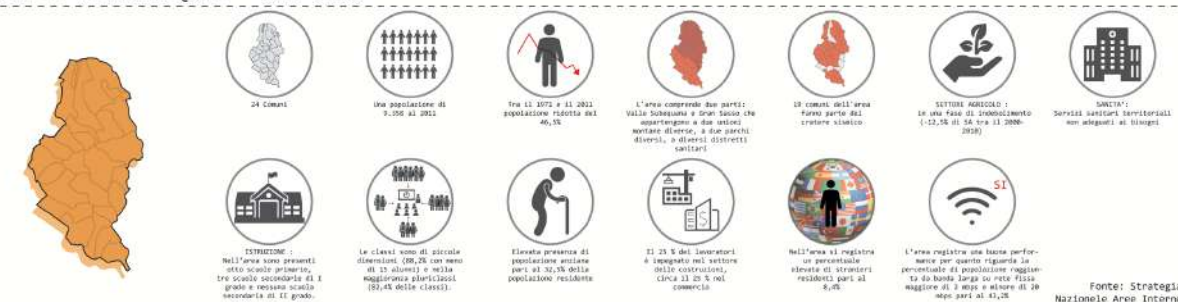

Area 2: VAL FINO VESTINA

Area 3: VALLE GIOVENCO - ROVETO

Area 4: VALLE SUBEQUANA - GRAN SASSO

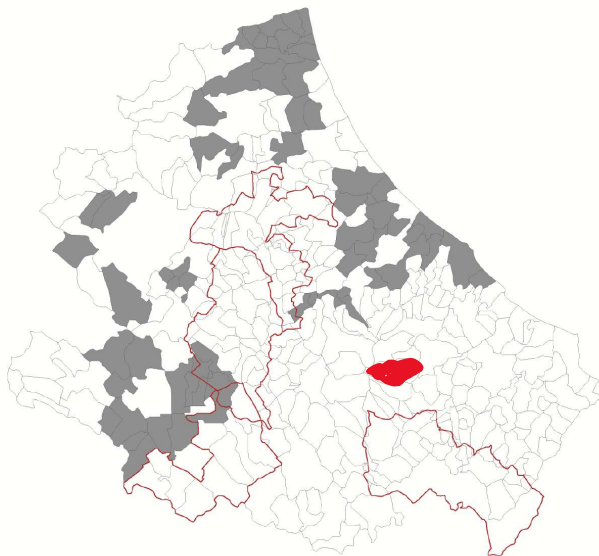

Fonte: Strategia Nazionale Aree Interne

Una volta individuati i Poli di Attrazione si è provveduto a dividere il territorio nazionale in diverse zone a seconda della distanza dai Poli misurata in tempi di percorrenza. In tal senso sono state individuate e mappate 4 distinte aree:

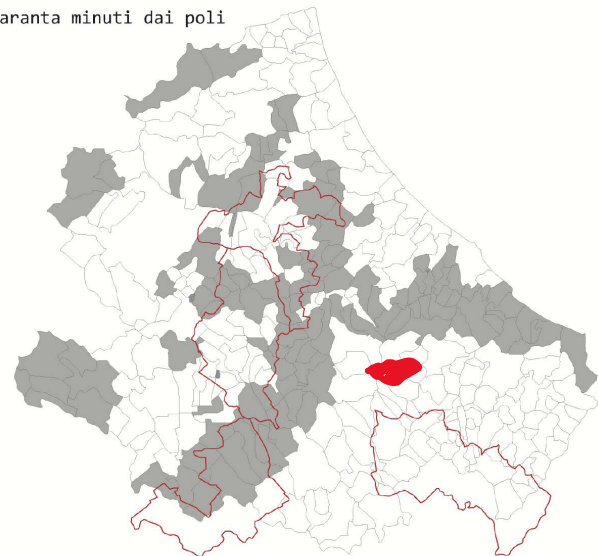

Aree di cintura

Distanti meno di venti minuti dai poli di attrazione

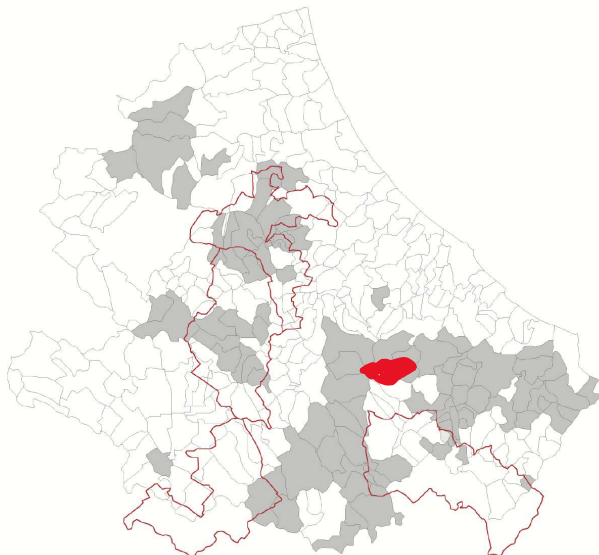

Aree intermedie

Distanti da venti a quaranta minuti dai poli

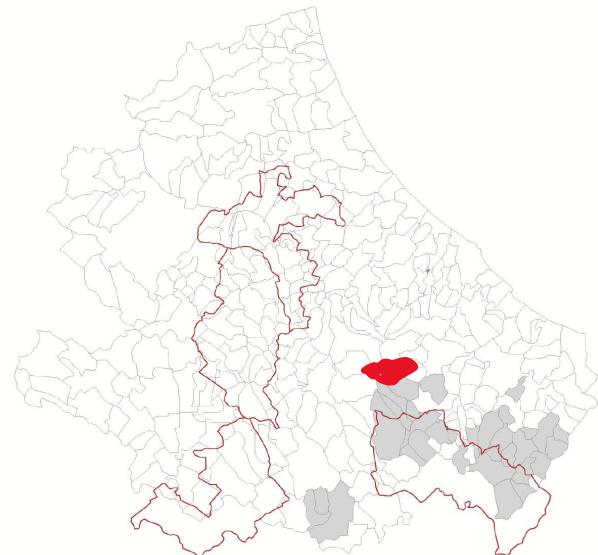

Aree periferiche

Distanti da quaranta a settantacinque minuti dai poli

Aree ultraperiferiche

Distanti oltre settantacinque minuti dai poli

Abstract

The line of research concerns the internal areas of the Abruzzo region, subject to a process of depopulation and abandonment. A phenomenon that affects almost all the Apennine areas of Italy and, to a lesser extent, the Alps. The same phenomenon also affects many rural regions of Portugal and Spain and for this reason the program aims to encourage the exchange of ideas, policies and best practices in the different Mediterranean countries.

The program has two main slots: the first consists of 4 online meetings of 3 hours each; the second of a 6-day workshop (plus two days of travel) to be held at the Pescara school of architecture. During the workshop, 2 days of study visits are planned in Fara San Martino, a small town in the Apennines which will constitute the case study for the experimental application. The design activity in the town will be patronized by the Maiella National Park, which will host the final day of presentation of the summer school works.

Online Seminars

Preparatory meetings

7th December: online staff meeting

2nd March: online staff meeting

Conference sessions with staff and students (May-June)

1st session (3h): Group self-presentation (staff and students); general information and presentation of the topic from the hosting institution; the National Strategy for Inner Areas (SNAI);

2nd session (3h): invited lecturer from the partners regarding the policies and best practices from Spain and Portugal;

3rd session (3h): partner senior students' presentation of the projects in development related to the topic;

4th session (3h): case study presentation by the hosting institution and discussion with Prof. Lucio Zazzara, President of the Maiella National Park and with the stakeholders of Fara San Martino; digital cartography and information distribution;

Summer School (in person)

September 11-16th (10th and 17th travel days).

10th Sept: Arrival in Pescara (at the Rome Airport and from the airport to Pescara by bus);

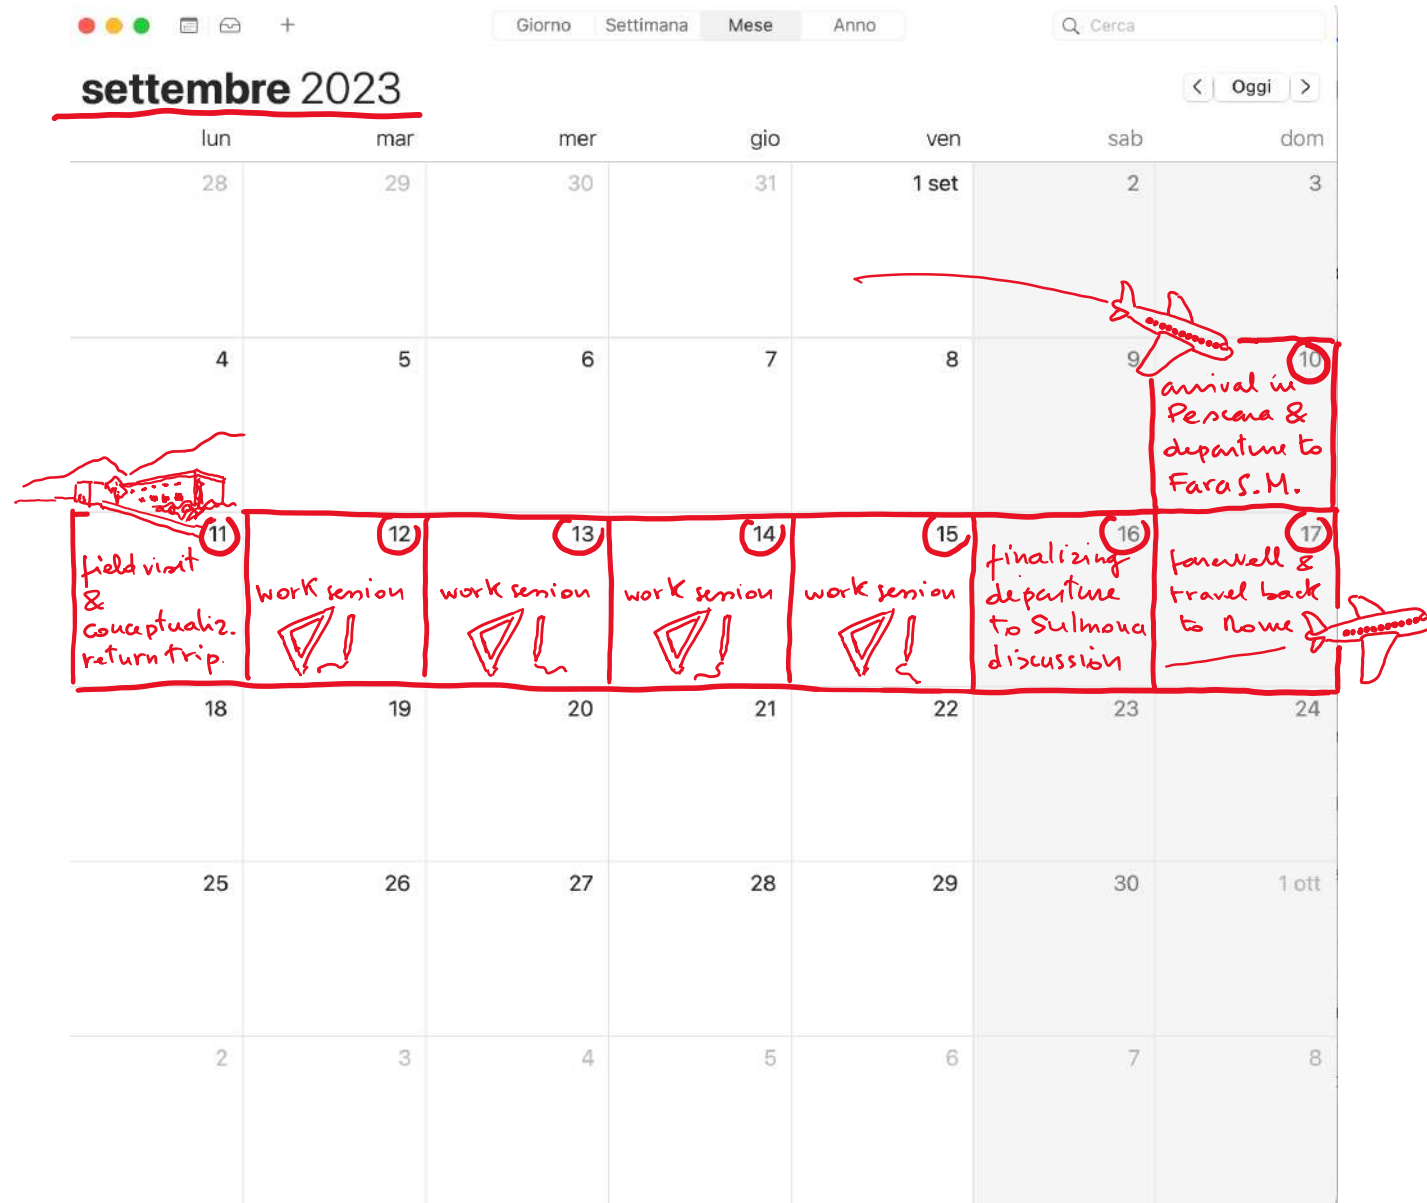

10th Sept. afternoon/evening: Departure to Fara San Martino; welcome dinner with the municipality and the Cocco pasta factory;

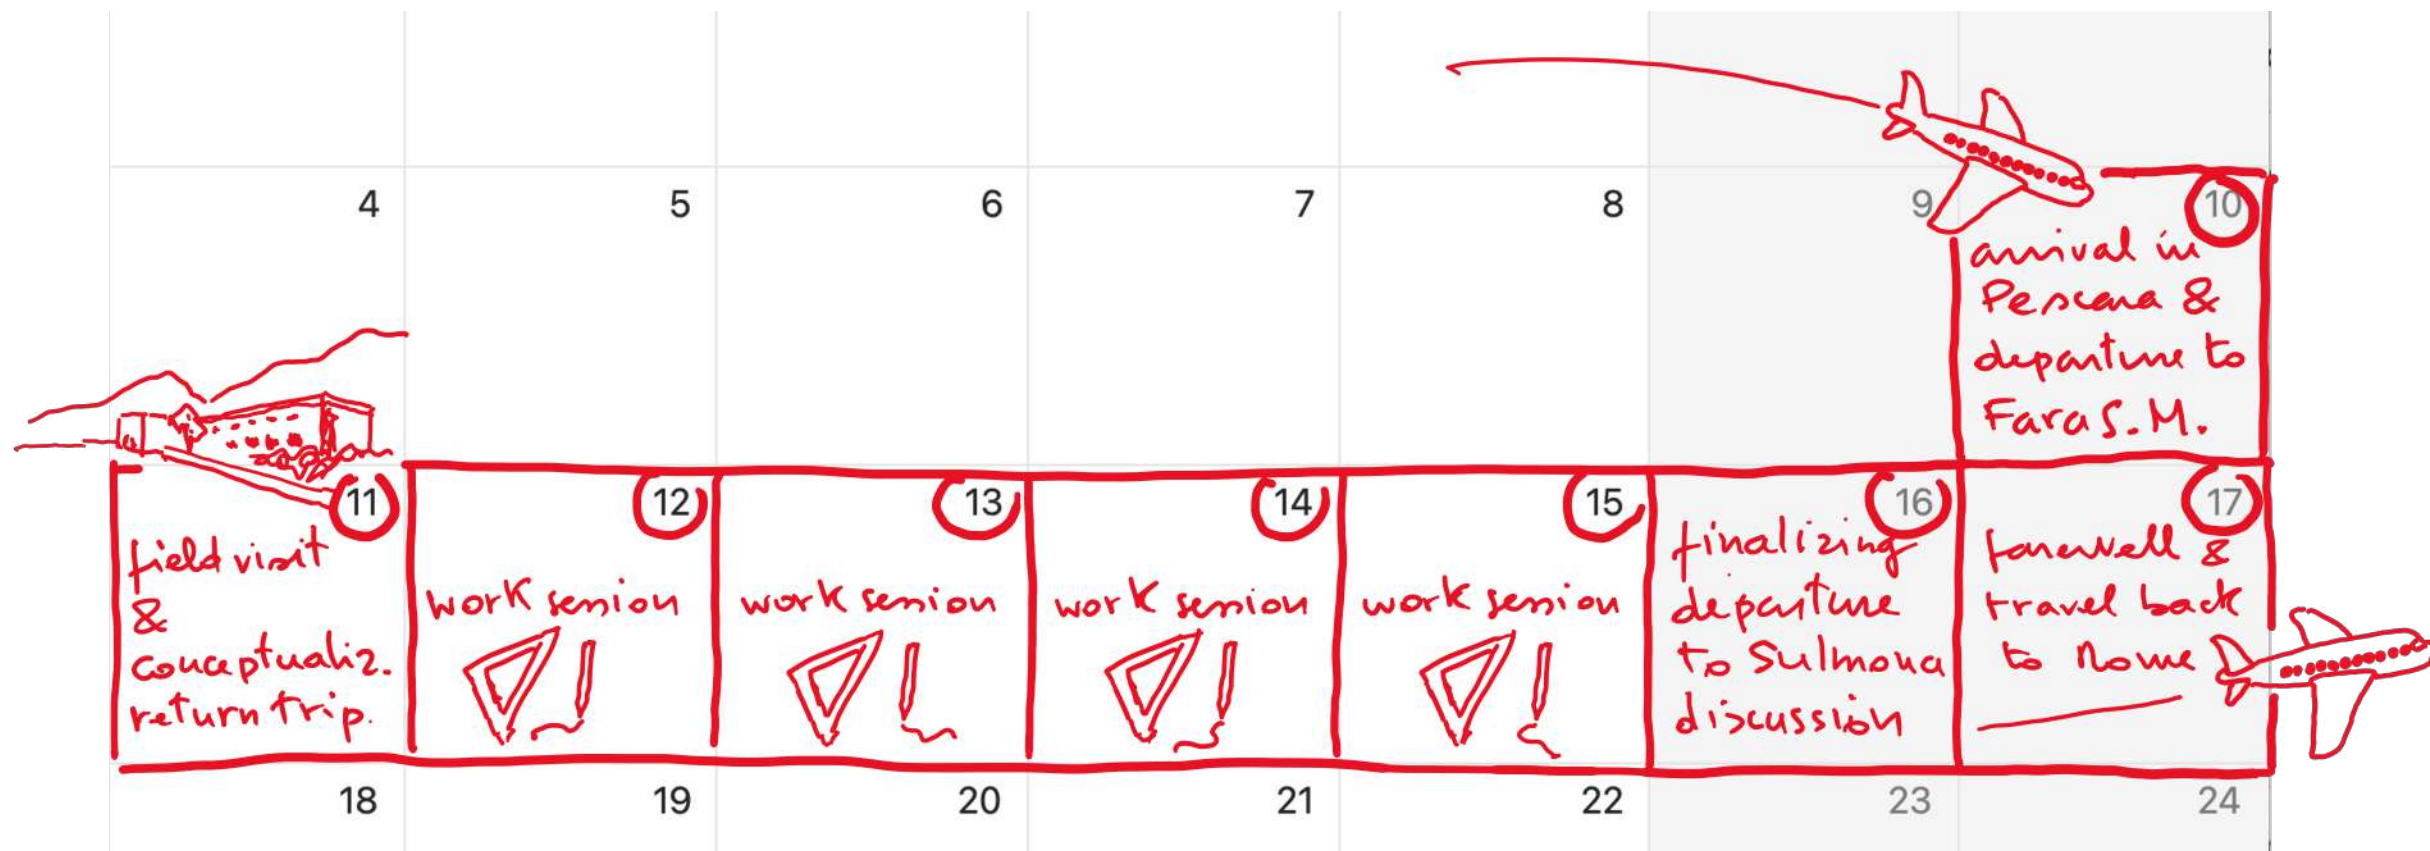

11th Sept: Field visit, brainstorming on the site of a disused textile factory; preliminary conceptualization; return trip to Pescara;

12-15th Sept: work sessions at the School of Architecture of Pescara;

16th Sept: Departure for Sulmona, headquarters of the Parco Nazionale for project presentations; discussion and concluding remarks; final social dinner; return trip to Pescara;

17th Sept: farewell and travel back to Rome airport;
