25th October 2017

HOW WE WILL MOVE IN THE NEXT FUTURE?
**Innovation in the transport sector through the challenge of sustainability
and digitalization**

Workshop
25th October 2017

Venue
Museo d'Arte Moderna "Vittoria Colonna"
Via Antonio Gramsci,
65122 Pescara (Italy)

Abstract: This document provides the agenda for "How we will move in the next future? Innovation in the transport sector through the challenge of sustainability and digitalization? Workshop to be held in Pescara, on 25 October 2017.

Mobility has a major influence on how we live our lives today. It helps to determine how people, businesses, communities and countries interact. It opens doors to new opportunities. It will shape our prosperity and quality of life in the future. The mobility sector plays a vital role in the EU economy and society. Yet today, mobility is undergoing profound transformations. Digitalisation, automation and alternative energy sources are transforming the transport system and challenging its traditional features (<https://ec.europa.eu/transport/sites/transport/files/mobility-package-factsheet-overall.pdf>).

The continuous development of cities and associated population growth, congestion and pollution has pushed sustainable urban mobility up the agenda. The need for more sustainable, intelligent and integrative planning processes as a way of dealing with these challenges and identifying an appropriate set of policies has been widely recognised.

At a time of limited finance for SUMP (Sustainable Urban Mobility Plans), it's really important for cities to be able to find measures that have a big impact but don't cost much – like improvements in micro accessibility, or low cost conversion of road space to public space for people.

09:30 – 14:30 Workshop on “HOW WILL WE MOVE IN THE NEXT FUTURE? Innovation in the transport sector through the challenge of sustainability and digitalization” led by **PAOLA DI SALVATORE (Managing Authority of IPA Adriatic Cross-border Cooperation Programme)**

SCHEDULE OF THE WORKSHOP

With workshop we want to answer the question how to “HOW WILL WE MOVE?” The aim is to help the sector to stay competitive in a socially fair transition towards clean energy and digitalization.
